Experience

Front-end Engineer, **Mentor Medier AS**   Jan 2024 –

- Develop, maintain, and build services that benefit five different publications owned by Mentor Medier AS, using Next.js, TypeScript, React.js, JavaScript, Tailwind CSS, AWS.

IT Consultant, **Netcompany**   Jun 2023 – Des 2023

- Develop and maintain code for client projects including Neumann Bygg AS, Møller Mobility Group using JavaScript, Vue.js, C#, ASP.NET MVC, Azure cloud
- Work alongside creative developers and architects to develop technical solutions to fulfill business requirements.

Front-end Developer, **Fremtind Forsikring**   Jan 2023 – May 2023 (bachelor's thesis)

- Designed and developed a case management system specifically for the Complaint Service Department (Klageservice) using Next.js, TypeScript, SCSS, and Fremtind's design library, Jøkul
- Primary objective of the project was to streamline operations by creating a user-friendly interface for efficient complaint handling, tracking, and closure
- Responsibility revolved around frontend development

Student Tutor, **Kristiania University College**   Aug 2021 – Jun 2023 (part time)

- Assisted students in the 1st and 2nd year with tasks they had in lab exercises
- Supervised students during learning, both in person and online
- Utilized various approaches based on the individual's learning style

Purchase Manager, **Komplett Group**   Feb 2018 – Jun 2020

- Responsible for CPU & motherboards
- Procurement, budgeting, negotiation on pricing, product range, estimation and forecasting, stock management, competitor pricing, plan releases
- Close contact and cooperation with suppliers and manufacturers

Education

Bachelor, Information technology - Frontend and mobile development
Kristiania University College

Aug 2020 – May 2023

- Foundational subjects in IT, including binary math, the TCP/IP model, general shell commands, and introductory knowledge of JavaScript, HTML, CSS, databases, object-oriented Java, and information security
- Web development and API design, interaction design, innovation and prototyping, Android programming and advanced Java programming
- Cross-platform development, software design, security in mobile development, iOS programming, React, and TypeScript
- Worked on multiple group projects with clients from the industry, to develop concepts into finished solutions
- Last semester involved conducting research and completing a bachelor's thesis within a company, addressing a specific problem with a technological solution and documentation

Skills

Programming Languages
JavaScript, TypeScript, HTML, Kotlin, Swift, Java, C#, CSS, Sass

Libraries & Frameworks
React, Next.js, Jetpack Compose, SwiftUI, Vue.js, Tailwind CSS, Bootstrap, Express.js, ASP.NET

Tools, Platforms & other
Git, GitHub, Node.js, Android, iOS, Azure, Vite, Webpack, Vercel, Heroku, Figma

Selected projects

Reversed Image Search app
Native android app built with Kotlin and XML, either take a picture or use an existing one to get similar images in return

runeoliveira.com
Personal website built with Next.js TypeScript and SCSS, hosted on Vercel

Interests

Flyfishing, brazilian jiu-jitsu, technology, video games, board games, alpine skiing
